# SIMPLIFYING COMPLEX SHIPPING CHALLENGES WITH INNOVATIVE SOLUTIONS

SJT Logistics remains committed to delivering reliable, safe, and cost-effective logistics solutions that meet the highest industry standards. Efficient logistics services not only ensure that products are delivered on time but also help reduce costs, improve customer satisfaction, and maintain the integrity of goods throughout the supply chain.

## » HEAVY TRANSPORT

A broad range of equipment ranging from extendable trailers, modular trailers, and self-propelled transporters, specializes in heavy lifting and engineered transport solutions for all types of equipment and cargo of various weights and dimensions.

## » HEAVY LIFT

The SJT Heavy Lift Team has a specialized fleet of equipment to lift and install heavy cargo ranging from 10 tons to 1,500 tons.

## » JACKING AND SKIDDING

We provide advanced jacking and skidding systems, which are essential for the power industry, specifically for positioning generators, transformers, and turbines onto foundations.

## » RIG MOVING OPERATIONS

reliable rig movement services, ensuring the safe transportation of rigs from ports to sites. With a dedicated safety team, we oversee logistics, route planning, equipment mobilization, and coordination with authorities.

25 TON TRUCK**

## HEAVY TRANSPORTATION TRAILERS

- PRIME MOVERS
- SELF-PROPELLED TRANSPORTERS
- POWER PACK UNITS
- AXLE LINES
- GANTRY SYSTEMS
- JACK-UP SYSTEMS

# How It Works

## Enquiry Stage

Customers submit requests via the website, social media, or email. A quotation is prepared and sent for client approval, which must be confirmed via official email.

## Confirmation Stage

All clearance documents are gathered, and a checklist is prepared with vessel arrival dates. The client must make all clearance-related payments to avoid demurrage. Once the pull-out is completed, an email confirmation is sent to the operations team.

## Customs Clearance Stage

All clearance documents are gathered, and a checklist is prepared with vessel arrival dates. The client must make all clearance-related payments to avoid demurrage. Once the pull-out is completed, an email confirmation is sent to the operations team.

## Operations Stage

Order Receipt by Warehouse - The warehouse verifies order details against customer requests. Inspection & Quality Check - Products undergo safety and quality inspections before processing. Picking, Packing & Shipping - Items are carefully selected, securely packed, and handed over to the carrier. Delivery & Performance Review - The order status is updated upon delivery, and performance is assessed to improve service quality.

## Invoicing Stage

The operations team provides all relevant documents, including waybills and extra charges. A proforma invoice is prepared and shared for client approval. The final invoice is generated and issued.

## Collection Stage

Payment is processed securely via Payoneer, PayPal, or Visa/MasterCard. A successful transaction confirms the order completion.

# Why choose us

## Over 1200 couriers

Global reach, over 1200 couriers forming a seamless network for worldwide deliveries.

## Automatic courier

Efficiency amplified through automation, reducing human intervention for accuracy.

## Real-time alert

Stay informed with instant updates, tracking your shipment's progress as it happens.

## Email alerts

Essential information directly to your inbox, ensuring you're always in the loop.
